

FoodCraft

the better way

***Most efficient picker
in the business!***

...the Barker Rotomatic RP-3

The Barker counter-rotating Picker utilizes the most original and versatile defeathering method available. The first opposing drums pick down; the next pick up. The alternating rotation assures the most gentle yet effective defeathering obtainable. This innovative Barker method allows lower scalding temperatures—for big energy savings—and picking that's less tight. The skin remains more firmly attached to assure a product of higher grade and yield after segmenting, with better appearance and value for the consumer.

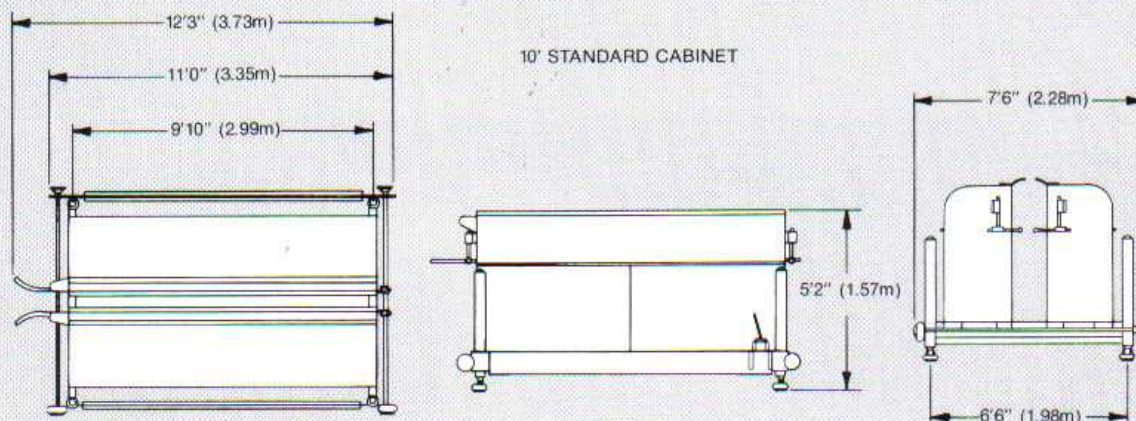

The Rotomatic's stainless steel frame, performance-proven gearboxes, all-gear drives, and fewer motors—in compartments sealed against blood and feathers—confirm FoodCraft's commitment to a quality and durability that lowers your maintenance requirements.

Specifications

MODEL	RP-3000-24	
LENGTH	11'0"	3.35 m
WIDTH	7'6"	2.28 m
HEIGHT	5'2"	1.57 m
MOTORS*	12—3 HP/230-460 Volts/60 HZ 3 PH./1750 RPM	
WATER	2—1" Pipelines	
FINGERS	1296—No. AP301	
COUNTER-ROTATING GEARBOXES	24	
HYDRAULIC PUMP	1	
SHIPPING WEIGHT (NET)	4560 lbs.	2069 kg
SHIPPING WEIGHT (GROSS)	5492 lbs.	2491 kg
